

IAM ACCESS GRANTED: AWS-SBG - Arcus General Assembly 001

Date: August 28, 2026 (Tentative)

Time: 2:00PM - 4:00PM (Tentative)

Activity Level: Major

Activity Type: Extra-Curricular

Main Objective

IAM ACCESS GRANTED: AWS-SBG - Arcus General Assembly 001 aims to successfully integrate newly-registered members into the AWS Student Builder Group environment by encouraging a highly collaborative and heartfelt institutional atmosphere. The event shall utilize the strategic execution of gamified social icebreakers and structured team-building exercises, targeting to dismantle social barriers, alleviate transitional academic anxieties, and transfigure unacquainted students into a supportive community of builders aligned with the organization's empowerment in advancing cloud computing competencies at Mapúa University.

Project Proponents

Target Proponents

Total Number of Members: 72

The event aims to cater 40 participants comprising the initial batch of official student members signed up to join AWS-SBG - Arcus, most of which have not collectively interacted in a physical, face-to-face setting with one another.

Description

IAM ACCESS GRANTED: AWS-SBG - Arcus General Assembly 001 is the inaugural welcoming initiative organized by the AWS Student Builder Group - Arcus. This assembly is meticulously engineered to cultivate a highly collaborative ecosystem among new organization members.

To maximize engagement and lower social intimidation often associated with technical student organizations, the assembly utilizes an innovative, gamified framework inspired by pop culture; e.g. Squid Game. Attendees are designated as active participants tasked with navigating collaborative challenges rather than remaining passive onlookers.

The event commences with a structured, high-energy orientation delivered by the Executive Board, establishing an approachable yet professional tone while outlining the organizational mandate, membership benefits, and upcoming developmental milestones.

Objectives

IAM ACCESS GRANTED: AWS SBG - Arcus General Assembly 001 is guided by the following core objectives:

- To actively strip down social barriers between organization members, successfully transitioning unacquainted attendees into comfortable, interactive peer networks via structured icebreakers.
- To deploy custom-developed mobile applications and gamified team challenges that cultivate real-time communication, collective strategy, and peer reliance.

- To provide a comprehensive, transparent orientation outlining the structural duties of each executive department, the explicit benefits of student membership, and the AWS cloud development milestones for the academic year.

Program Education Objective/s (PEO) Satisfied

This activity supports the development of students who can work effectively within collaborative, multidisciplinary teams, as demonstrated through the event's structured team-building exercises and peer-reliance challenges. It also reinforces students' ability to function both independently and as part of a team, reflected in the shift from passive orientation to active, team-based participation throughout the program.

Mapúa Core Values Alignment

This activity reflects the organization's Commitment by dedicating structured time and resources toward the smooth integration of newly-registered members, rather than leaving onboarding informal. It also demonstrates Relevance by tying membership onboarding directly to real, industry-relevant cloud computing competencies, ensuring the community-building effort stays grounded in the organization's technical mission. Finally, the event models Excellence through its structured, gamified framework, setting a higher standard of engagement than a passive orientation would.

Guidelines

To ensure a safe, inclusive, and professionally managed environment that aligns with the standards of Mapúa University and its Council of Organizations, the following guidelines will be strictly enforced throughout the event:

1. **Voluntary Participation:** participation in all interactive games and icebreakers is highly encouraged but strictly voluntary. Students who possess physical limitations, social anxieties, or a general preference not to participate in certain challenges will be provided with alternative, less pressuring roles (e.g. scorekeepers, team strategists, etc.) to ensure they remain included into the community without discomfort.

2. **Inclusivity and Professional Decorum:** the Executive Board and designated facilitators are required to maintain a welcoming and respectful environment at all times. The thematic elements will be executed with a tone of playful camaraderie rather than sheer intimidation. Derogatory language, excessive physical contact, or unprofessional conduct during the networking and gaming segments are strictly prohibited.
3. **Data Privacy:** all student information collected during the event will be handled in strict compliance with the Data Privacy Act of 2012. Data will be utilized exclusively for organizational onboarding, official Mapúa COO documentation, and granting access to AWS educational modules.
4. **Safeguarded Technical Execution:** to prevent operational delays and ensure a high-quality participant experience, the Arcus technical team will conduct a comprehensive stress test of all custom-developed mobile games, local network connectivity, and AWS integrations prior to the arrival of the attendees. Redundant systems (e.g. offline alternatives for digital games) will be prepared in the event of local network instability.

Budget Proposal

Total Allocated Budget: ₱2,400

Budget Proposal			
Expenses	Quantity	Unit Price	Total
Thematic Printed Materials	15 pages	₱10	₱150
Heavy Duty Rope (24mm)	1 pc	₱450	₱450
Sipa Toy	1 pack	₱50	₱50
Merch (Filament, Production, Keyrings)	50 pcs	₱7.00	₱350
Angel's Pizza 14-inch Pizza (Buy 1 Take 1)	2 orders	₱700	₱1,400
Total			₱2,400

Event Schedules and Tasks

IAM ACCESS GRANTED: AWS SBG - Arcus General Assembly 001 August 28, 2026 2:00PM - 4:00PM Mapúa University Makati
